

Martus™ 5.1 Quick Start Guide

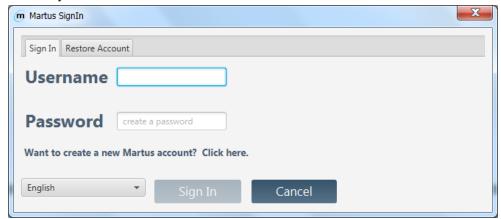

https://www.martus.org

Creating an account

- 1. Start Martus.
- 2. If there are no other Martus accounts on your computer, the *Martus Setup Wizard* will start and walk you through account creation. If other accounts already exist on your computer, click the **New Account** tab in the *Martus SignIn* dialog box to start the *Martus Setup Wizard*.

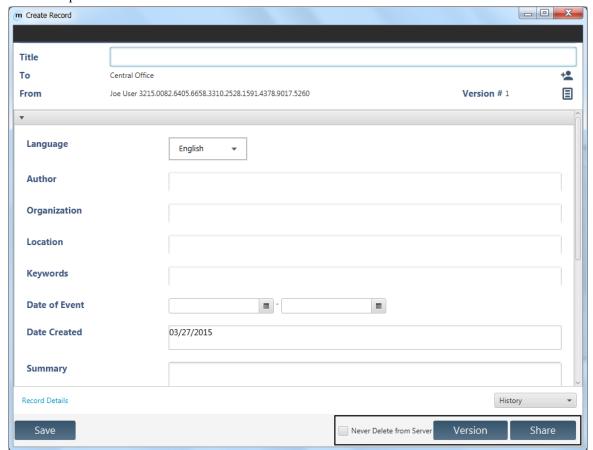

3. The next time you open Martus, input your *username* and *password* in the *Martus Sign In* dialog box to access your account.

Multiple Martus accounts can exist on the same computer. Click the "Want to create a new Martus account" link to create additional accounts; click Restore Account to restore accounts from key backup files.

Creating a Record

- 1. Select + to add a new record.
- 2. Input a *Title*.
- 3. Select the **Add Contact** icon **to** add contacts with whom you want to share the record.
- 4. Select the **Template Selector** icon 🗉 to choose a different form template for your record.
- 5. Input information in the relevant record fields.

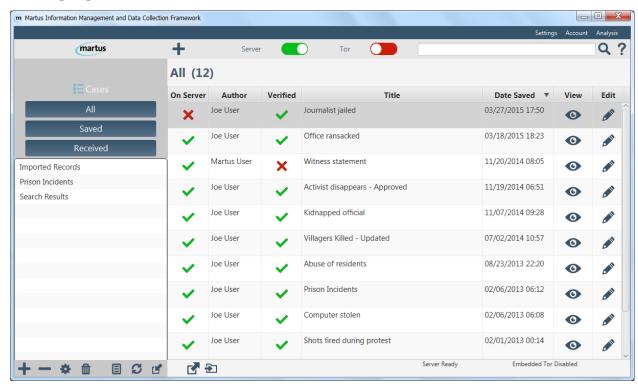

- 6. Select the **Attachments** tab within the *Create Record* window.
- 7. Click **Add** and then select the file you want to attach.

8. Choose to **Save**, create a new **Version**, or **Share**.

Martus automatically saves backup copies of saved, versioned and shared records to the Martus server as long as your configured server is set to On in the Martus main taskbar.

Managing records

The Main Taskbar

- Create a record with the click of a button!
- Toggle your **Server** connection **On** and **Off**.
- Turn embedded **Tor** use **On** and **Off**.
- Perform a simple text Search across all of your records.
- Select Help for information about your Martus version and Martus documentation.

The Record List Pane

- Sort your records by multiple fields:
 - On Server (indicates whether or not the record has been saved to your configured server) Author
 - *Verified* (indicates whether the record was created by a contact that you have verified) *Title*
 - Date Saved
- View and Edit * records at your convenience.
- Delete , Export , Move , and Copy records.

The Sidebar

- Customize your Case labels (which function like folders) with the **Label Manager** and organize records with the **Add** and **Delete** options.
- Manage deleted records in the **Trash**
- Use the **Template Manager** let to upload, download and edit customized data entry templates.
- Upload and download records using the Sync Manager .
- Import Records into Martus from your local device.

Finding the record you need

Performing a Simple Search

The simple search allows you to search your records from the Martus main taskbar.

- 1. Input your search terms in the *Search* field of the Martus main taskbar.
- 2. Select **Search**. Your search results will be listed in the record list pane under the heading *Search Results*.

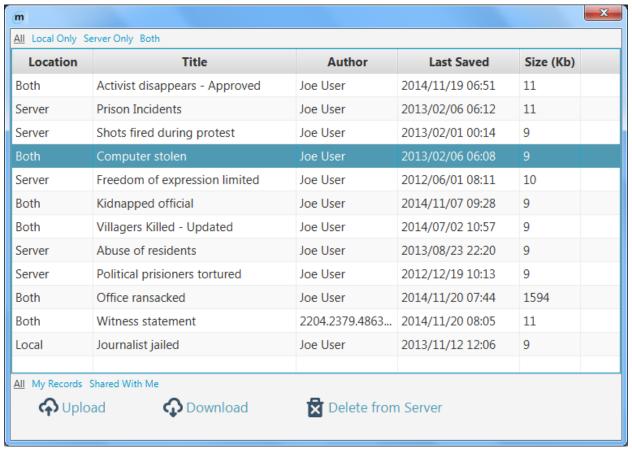

For Advanced Search options go to the Analysis menu.

Uploading, Downloading, and Deleting records

The Martus **Sync Manager** allows you to upload and download records to/from the server as well as view where records are located and whether they were created by you or a contact.

- 1. Select the **Sync Manager** icon from the Martus sidebar.
- 2. Select the desired record.

Note: The Sync Manager may not appear immediately, depending on the speed of your Internet connection.

- 3. Select the records you would like to download.
- 4. Select Upload / Download / Delete from Server.
